Internship – Geotechnical Engineering Focus

Company Overview
Barr Engineering Company provides a wide range of consulting services in engineering and environmental disciplines. The company includes more than 700 employees in more than 20 disciplines. Our engineers work on projects related to water resources, structures, geotechnical analysis and design, environmental facilities design, waste treatment process design, assessment of the fate of chemicals in the environment, and remediation of contaminated soil and water.

Position Summary
The person selected for this internship may assist with a variety of projects including basic engineering computations, AutoCAD drafting, field data collection, site survey, preparing appropriate documentation, computer analysis, assisting in the design of solutions, and monitoring construction projects.

NOTE: Some work locations may feature rough terrain typical of construction sites, or working on tall structures or with industrial equipment. Safety training will be provided prior to being given work assignments on such sites.

Position Location: Minneapolis, MN

Minimum Qualifications
• GPA of 3.2 minimum but 3.5 or higher preferred
• Strong communication/consulting skills and interests
• Completion of at least one semester of chemistry, two semesters of physics, and three semesters of mathematics
• Ongoing enrollment in civil engineering or geotechnical degree program
• Familiarity with Microsoft Windows OS and Microsoft Office software
• Conscientiousness concerning the accuracy, appropriateness and timeliness of results
• Thorough, organized, detail-oriented approach
• Must be legally authorized to work in the United States without the need for sponsorship now or in the future
• Acceptable driving record

Barr Engineering Co. reserves the right to consider other legitimate, non-discriminatory factors, that are not specifically listed.

We require proof of eligibility to work in the United States.
